Tulip Gold Standard Injection Sets

Considered by surgeons worldwide to be the ideal sets for successful fat re-injection –

The Tulip Gold Standard Facial Set™

This complete set contains Tulip’s patented SuperLuerLok hub and proprietary CellFriendly cannulas to harvest and re-inject adipose tissue with improved viability. This set includes a Tumescent Infiltrator and a Sorensen Harvester with 1mm micro-ports to harvest tissue that is compatible with Tulip’s three micro injectors:

- The Tulip Injector 0.7mm x 4cm (for the periorbital region)
- The Tulip Injector 0.9mm x 5cm (for the midface, lips, and temple)
- The Tulip Injector 1.2mm x 7cm (for the mandibular region)

The Tulip Injector is designed with a blunt tip to pass through soft tissue easily without the trauma or potential risks that are involved with sharp needles.
Note: Other harvesters can be substituted for the Sorensen Harvester.
Please call 800-325-6526 to request this option when ordering.

1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
1 each Sorensen Harvester SuperLuerLok 2.4mm x 20cm
1 each Tulip Micro Injector SuperLuerLok 0.7mm x 4cm
1 each Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
1 each Tulip Micro Injector SuperLuerLok 1.2mm x 7cm
1 each JohnnieLok BD 10cc
1 each JohnnieLok BD 20cc
1 each Decant Stand & Anaerobic Transfer Luer to Luer

The Tulip Gold Standard Breast Set™

This set includes harvesting, re-injecting, and contouring instruments designed with Tulip’s patented SuperLuerLok hub and proprietary CellFriendly Technology. It includes a Sorensen Harvester with 1.5mm ports that are compatible with Tulip’s Spoon Tip Injectors:

- The Spoon Tip Injector 1.6mm x 9cm (for contouring)
- The Spoon Tip Injector 2.1mm x 15cm (for volume injection)
- The Spoon Tip Injector 3.0mm x 20cm (for volume injection)

The Spoon Tip Injector is specifically designed with an open, single port and beveled blunt tip to pass quickly and safely through tissue while allowing for a rapid injection.
Note: Other harvesters can be substituted for the Sorensen Harvester.
Please call 800-325-6526 to request this option when ordering.

1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
1 each Sorensen Harvester SuperLuerLok 3.0mm x 20cm
1 each Spoon Tip Injector SuperLuerLok 1.6mm x 9cm
1 each Spoon Tip Injector SuperLuerLok 2.1mm x 15cm
1 each Spoon Tip Injector SuperLuerLok 3.0mm x 20cm
1 each JohnnieLok BD 20cc
1 each JohnnieLok 60cc
1 each Decant Stand & Anaerobic Transfer Luer to Luer
The Tools You Need To Unlock The Power Of Fat

The Tulip Machine Assisted MEGA Volume Set™

This set is for machine-assisted harvesting and manual re-injection. It includes Tulip’s proprietary Sorensen Machine Harvester. This unique, atraumatic harvester delivers a smooth consistency of fat ideal for re-injection. For the decanting and washing of the harvested fat, the set also includes an autoclavable, 2000ml canister. After easily transferring the decanted fat into injection syringes through the canister’s transfer port, the CellFriendly Tulip Spoon Tip Injectors allow for blunt and rapid precision re-injection.

1 each Sorensen Harvester Power Cannula 3.7mm x 20cm
1 each Spoon Tip Injector SuperLuerLok 2.1mm x 15cm
1 each Spoon Tip Injector SuperLuerLok 2.4mm x 15cm
1 each Spoon Tip Injector SuperLuerLok 3.0mm x 20cm
1 each Spoon Tip Injector SuperLuerLok 3.7mm x 20cm
1 each Fat Canister 2000mL

Visit TulipMedical.com to see more available sets

Tulip’s reusable sets can be customized to meet specific needs. Call 800-325-6526 to request modifications.
GEMS Small Volume Transfer Kit™
for Facial and Hand Procedures
Everything needed for one small volume (up to 100cc)
transfer procedure in a sterile, disposable kit.
Note: A Carraway Harvester can be substituted for the Tonnard.
1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
1 each Tonnard Harvester SuperLuerLok 2.4mm x 20cm
1 each Tulip Micro Injector SuperLuerLok 0.7mm x 4cm
1 each Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
1 each Tulip Micro Injector SuperLuerLok 1.2mm x 5cm
2 each Disposable JohnnieLok 10/12cc Monoject
2 each Tulip Transparent Transfers
10 each Harvesting Syringes, Monoject 12cc
10 each Injection Syringes, BD 1cc

GEMS Breast Kit™
Everything needed for one fat transfer procedure to the breasts in
a sterile, disposable kit. Ideal for both breast reconstruction and
cosmetic augmentation procedures.
Note: A Carraway Harvester can be substituted for the Tonnard.
1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
2 each Tonnard Harvester SuperLuerLok 2.4mm x 20cm
1 each Spoon Tip Injector SuperLuerLok 2.1mm x 15cm
1 each Spoon Tip Injector SuperLuerLok 3.0mm x 20cm
2 each Johnnie Snap 60cc
2 each Tulip Transparent Transfers
6 each Harvesting Syringes 60cc
10 each Injection Syringes, BD 10cc

Alexander GEMS Regen Harvesting Kit™
Ideal single-use Regen kit for small volume harvesting (40cc) and
transfer of fat tissue.
1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 12cm
1 each Carraway Harvester SuperLuerLok 2.1mm x 10cm
1 each Johnnie Snap 20cc
2 each Tulip Transparent Transfers
2 each Harvesting Syringes, BD 20cc

Miller GEMS Regen Harvesting Kit™
Rapid harvesting and transfer kit for Regen procedures requiring
60cc and more of fat tissue.
1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
1 each Miller Speed Harvester SuperLuerLok 2.1mm x 15cm
1 each Johnnie Snap 60cc
2 each Tulip Transparent Transfers
2 each Harvesting Syringes 60cc

Tulip GEMS Regen Injection Kit™
Single-use blunt injectors designed for safe fat injection.
1 each Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
1 each Tulip Micro Injector SuperLuerLok 1.2mm x 7cm
10 each Injection Syringes, BD 1cc

GEMS single-use kits are the only premium fat transfer instruments designed to eliminate risk of cross-contamination while providing top-of-the-line Tulip performance.

GEMS Procedure Kits include all of the instruments needed for one procedure, including syringes, locks, and transfers.

And it gets better – they’re all CellFriendly.
Doctor Recommended Instrument Sets

J.W. Little Set™
The J.W. Little Set, a CellFriendly, reusable set inspired by Dr. J. William Little, is designed for extremely precise injection.

- 1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
- 1 each Sorensen Harvester SuperLuerLok 2.4mm x 20cm
- 1 each J.W. Little Harvester SuperLuerLok 0.7mm x 4cm
- 1 each J.W. Little Harvester SuperLuerLok 0.9mm x 5cm
- 1 each J.W. Little Harvester SuperLuerLok 1.2mm x 8cm
- 1 each Anaerobic Transfer Luer to Luer
- 2 each JohnnieLok BD 10cc

Marten Clinic Starter Set™
The Marten Set, designed and inspired by Dr. Timothy Marten, is a reusable and CellFriendly starter set for the discriminating facial surgeon.

- 1 each Tumescent Infiltrator SuperLuerLok 1.6mm x 15cm
- 1 each Carraway Harvester SuperLuerLok 2.1mm x 15cm
- 1 each Carraway Harvester SuperLuerLok 2.4mm x 15cm
- 2 each Tulip Micro Injector SuperLuerLok 0.7mm x 4cm
- 2 each Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
- 1 each Tulip Laboratory Centrifuge
- 1 each Anaerobic Transfer Luer to Luer
- 1 each Tulip Z-Stand Syringe Rack Small

Tonnard/Verpaele MicroFat Set™
This reusable and CellFriendly set includes instruments designed and recommended by Dr. Patrick Tonnard and Dr. Alexis Verpaele.

- 1 each Tumescent Infiltrator SuperLuerLok 2.1mm x 20cm
- 1 each Tonnard Harvester SuperLuerLok 2.4mm x 20cm
- 1 each Tonnard Superficial Injector SuperLuerLok 0.7mm x 5cm
- 1 each Tonnard Superficial Injector SuperLuerLok 0.9mm x 7cm
- 1 each Tulip Micro Injector SuperLuerLok 0.7mm x 4cm
- 1 each Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
- 1 each Tulip Emulsifier & Anaerobic Transfer Luer to Luer
- 1 each JohnnieLok BD 10cc
- 1 each JohnnieLok BD 20cc
- 1 each Tulip Z-Stand Syringe Rack Small

Jeroen Stevens Sets™
The Jeroen Stevens Sets are designed for “Organic Surgery.” This allows for (re)creation of volume and curves on a multi-dimensional scale to refine softness, improve tissue texture, and regenerate.

Jeroen Stevens Small Volume Set™

- 1 each Tumescent Infiltrator Luer Lock 2.1mm x 24cm
- 1 each Portless V-Dissector 1.6mm x 9cm
- 1 each Sorensen Harvester SuperLuerLok 2.4mm x 22cm
- 1 each Curved Tulip Injector SuperLuerLok 1.4mm x 10cm
- 1 each Curved Tulip Injector SuperLuerLok 1.6mm x 15cm
- 1 each Tulip Micro Injector SuperLuerLok 0.9mm x 5cm
- 1 each Emulsifier Decant Stand & Anaerobic Transfer Luer to Luer

Jeroen Stevens Large Volume Set™

- 1 each Tumescent Infiltrator Luer Lock 2.4mm x 32cm
- 1 each Sorensen Harvester 60cc 3.0mm x 30cm
- 1 each Tulip Injector SuperLuerLok 2.1mm x 17cm
- 1 each Tulip Injector SuperLuerLok 2.4mm x 17cm

Tulip has the great honor of working with leaders in the field of fat transfer in putting together recommended instrument sets. Order these sets, or use them as an idea-starter to customize a specialty set.
Tulip CellFriendly™ – The Gold Standard in Cannulas

**Infiltrators**

**Tumescent Infiltrator™**
Used specifically for the infusion of tumescent solution and for hydraulic dissection. The port configuration allows even distribution of the fluid.

**Liposuction Cannulas**

**Stevens Speed Cannula™**
NEW! Exclusively from Tulip - An advanced liposculpture cannula with both micro and macro ports.

**Cobra Bibevel™**
More aggressive than the Standard, Pyramid or Mercedes, this cannula has a tapered tip with two ports and works effectively within dense fibrous tissue.

**Cobra Round Tip™**
Less aggressive than the Cobra Bibevel, this cannula has a rounded tip with two ports and works effectively within dense fibrous tissue.

**Standard™**
This is the most common cannula design for adipose tissue removal. The single port is located 180 degrees from the thumb rest on the hub.

**Pyramid™**
This commonly used design has three ports located 180 degrees from the thumb print. It is a slightly more aggressive cannula than the Standard.

**Mercedes™**
This circumferential three port configuration is effective for multi-plane adipose tissue harvesting.

**Harvesters**

**Sorensen Harvester™**
A multiport harvester with beveled, sharp microports. The 12 or 20 port configuration allows for harvesting both on the forward and backward strokes.

**Sforza Harvester™**
NEW! Exclusively from Tulip - a microport harvester designed for speed. Bidirectional barbed and beveled ports positioned asymmetrically create a helical flux that allows all ports to share the same aspiration pressure.

**Miller Speed Harvester™**
Six port spiral configuration on this CellFriendly cannula harvests maximum tissue volume in minimal time.

**Carraway Harvester™**
Spiral three-port design for multi-plane harvesting.

**TriPort Harvester™**
Excellent for harvesting small aliquots of adipose tissue.

**Specialty Cannulas**

**Flap™**
The Flap is primarily used as an undermining dissector, and in smaller diameters, for facial tissue removal.

**Field Flap™**
An elevated leading edge on this cannula is designed to open and expose adipose tissue for more precise suctioning along the mandible and sub-mental areas.

**V–Dissector™**
This cannula is specifically designed for use in the superficial compartment. The cutting notch is very useful for releasing dense fibrous tissue. Now available portless - see page 10 for details.

**Basket Cannula™**
The three-port Basket is used in areas with skin irregularities as an equalizer, injector, and suction cannula.

Call 800-325-6526 • Order online: TulipMedical.com
J.W. Little Injector™
Blunt injector designed for precision delivery of very small aliquots of adipose tissue – especially useful in the periorbital region and the vermilion-skin border of the lips.

Tonnard Superficial Injector™
Used for the intradermal injection of harvested microfat, the graduated spiral ports on this injector deliver microfat in a fan-shaped spread of droplets.

Blunt & Sharp Extractor / Injector™
This tip works well for needle extraction of adipose tissue and as a adipose tissue reinjection needle.

Tulip Curved Injectors™
Tulip's uniquely curved injectors give the surgeon precise control of the injection plane. Turned downward, the curved injectors volumetrically fill in the deep plane. Turned up the injectors glide against the superficial plane to stimulate regenerative results. Injector styles available with this powerful advantage include the Tulip Injector and the Spoon Tip Injector.

** Only available in single-use
Tumescent Infiltrator™
This cannula is used specifically for the infusion of tumescent solution and for hydraulic dissection. The configuration of the ports allows even distribution of the fluid.

Tonnard Harvester™
A multiport harvester with elevated, sharp microports. The 12 or 20 port configuration allows for harvesting both on the forward and backward strokes.

TriPort Harvester™
Excellent for harvesting small aliquots of tissue.

Carraway Harvester™
Spiral three-port design for multi-plane harvesting.

Miller Speed Harvester™
Six port spiral configuration on this CellFriendly cannula harvests maximum tissue volume in minimal time.

Tulip Injector™
Rounded blunt tip design passes through soft tissue easily without the trauma or potential problems of sharp injectors.

Spoon Tip Injector™
Blunt injector designed with a more open port for rapid injection of larger volumes.

The Tulip SuperLuerLok™
U.S. Patent Number 6,569,118
Get more security and control. Another advantage only from Tulip!

Universal SuperLuerLok™ Adaptor
Adapts luer lock syringes, stopcocks and valves of any brand for use with Tulip’s patented and recommended SuperLuerLok hub.

Tulip’s proprietary CellFriendly Technology is now available in premium, pre-sterilized, single-use instruments. Tulip GEMS eliminate risk of cross-contamination while providing top-of-the-line performance. The proprietary, lubricious coating allows the instruments to glide easily through tissue and resist clogging. Tulip GEMS – simply the best.
Why Tulip Single-Use Instruments?

See The Difference

Over time reusable cannulas can corrode and become more porous, creating potential harbors for microbial growth. Now with Tulip’s Premium, Single-Use GEMS, related risks of infection and cross-contamination are virtually eliminated - Tulip quality in a single-use device.
Tulip Emulsifier™

The Tulip Emulsifier standardizes the texture of harvested adipose tissue for easy and smooth subdermal and intradermal injection with micro-injectors. Available as a decant stand or a transfer.

Anaerobic Transfer™

Anaerobic transfers are used to prepare and transfer extracted tissue for re-injection. The Decant Stand design also allows for a natural gravity decant.

- Decant Stands
  - 60cc toomey to 60cc toomey
  - 60cc toomey to luer lock
  - 60cc BD catheter to luer lock
  - Luer lock to luer lock

- Anaerobic Transfers
  - Luer to luer

Tulip Transparent Transfer™

Tulip’s single-use, pre-sterilized transfers are designed for easy, clean, closed-system transportation of adipose tissue between luer lock syringes.

Call 800-325-6526 • Order online: TulipMedical.com
Pocar™
The Pocar is a percutaneous punch that is used to make a circumferential incision prior to infiltration and tissue extraction. It is designed to maintain a tight seal while minimizing scarring.

Portless V-Dissector™
Tulip’s Portless V-Dissector is a specialized tool that is used to prepare dense and fibrous tissue for infiltration and tissue extraction. The cutting notch is very useful for undermining in facial procedures and in areas where the tissue must be broken down due to acne scarring, stretch marks, and other fibrous deposits. 9cm in length.

Tulip Syringe Line
We offer a full line of syringes for use with our liposuction cannulas, micro injectors and accessories.

A. 60cc Toomey Monoject Syringe - box of 20
B. 60cc Luer Monoject Syringe - box of 20
C. 60cc Catheter BD Syringe - box of 20
D. 20cc Luer Monoject Syringe - box of 50
E. 20cc Luer BD Syringe - box of 40
F. 12cc Luer Monoject Syringe - box of 80
G. 10cc Luer BD Syringe - box of 100
H. 10cc Oral Medication Monoject Syringe (non-sterile) - box of 100
I. 3cc Luer Monoject Syringe - box of 100
J. 1cc Luer BD Polycarbonate Syringe - box of 100

Syringe Tip Caps
Luer Lock Syringes (Sterile)
Reusable Toomey Tip (non-sterile)
Tulip Power Connections

Power and Control

Universal Power Injector™
The Power injector allows the surgeon to re-inject soft tissue through large or small diameter injectors with very little effort and maximum control. The Universal Power Injector will hold a 10cc or a 20cc BD syringe or a 60cc Monoject syringe.

Tulip Power Cannula™
Order Tulip Cannulas and Harvesters as a one piece instrument ready to use with an aspiration machine for liposuction and large volume fat harvesting procedures. Tulip’s lubricious CellFriendly instruments can now be ordered configured with a permanent handle and hose barb.

Power Adaptor™
The Tulip Power Adaptor modifies the cannula and the syringe for use with an aspirating machine.
- 60cc Monoject
- 60cc BD
- 20cc BD
- 20cc Monoject

Machine, Syringe, Or Both, Tulip Instruments Offer Superior Results

Call 800-325-6526 • Order online: TulipMedical.com
**JohnnieLok™**

The unique, light-weight JohnnieLok slips onto the collar of the syringe barrel. The plunger is drawn back to the desired cc for precision measurement on the syringe. Then, with a small twist, teeth on the lock bite into the plunger flanges and lock the plunger securely to the barrel, holding the syringe under vacuum for precision extraction.

**SnapLoks™**

These syringe snap locks fit into the plunger flanges of the syringe. When the plunger is pulled out, the lock snaps open on the barrel lip, thus holding the syringe under vacuum.

**JohnnieSnap™**

The single-use JohnnieSnap syringe lock is designed to maintain vacuum at variable pressure levels, from low to high. The JohnnieSnap comes in two sizes, 20cc and 60cc, and fits the following syringes:

- 20cc BD Syringes
- 20cc Monoject Syringes
- 60cc BD Syringes
- 60cc Monoject Syringes

Available in six popular syringe sizes.

- 60cc Monoject
- 60cc BD
- 20cc BD
- 20cc Monoject
- 10/12cc Monoject
- 10cc BD

---

**Tulip Syringe Locks**
**Tulip Operating Room Centrifuge**
This centrifuge is designed for complete operator protection within budget-minded O.R.’s. Accurate speeds for specific g-forces give you proper separations without cell damage and make this unit ideal for Coleman Technique fat processing, prolotherapy and regenerative medicine usage.

This model has variable speeds and accommodates sealed tubes for aerosol containment.

Capacity: 90mL (6 x 15mL).
It has a brushless motor that is maintenance-free.
120V US or 240V for EU

**Tulip Variable Speed Centrifuge**
This centrifuge is the perfect compliment to your CellFriendly tool kit. Accurate speeds up to 3,300rpm/12g’s give you proper separations without cell damage and make this unit ideal for rejuvenation and regenerative medicine procedures.
For laboratory use only.

**Available in 5 sizes**

**Tulip Reusable Large Volume Decanting Canisters™**
These reusable canisters work with your suction machine to collect, measure, decant and transfer in one simple step. Folding stand for convenient autoclaving and storage.

Available in 5 sizes: 250ml, 500ml, 1000ml, 2000ml, 3000ml

**Single-Use Large Volume Decanting Canisters™**

**Tissue-Trans® Filtron Units**
3 sizes available 500cc, 1000cc, 2000cc
Closed system with proven filtering and fat viability, no centrifuge needed.

**Tissue-Trans® Mega 1500cc**
All material collected in a sterile bag; decant and process in physician’s preferred method.

**Tissue-Trans® Syringe FILL 360cc**
Harvest fat directly into re-injection syringes. Closed system with no mess or transfers.

**Tissue-Trans® Stands**
34” and 52” to raise the sterile field

Call 800-325-6526 • Order online: TulipMedical.com
Cleaning and Sterilization

**The Tulip Z Stand – Form Follows Function**
No Assembly Required • Easy to Clean • Virtually Indestructible

**Cleaning and Sterilization**

**Cannula Cleaning Soft Picks™**
Cleaning even the smallest CellFriendly micro injectors is quick, easy and gentle. Guaranteed not to score, abrade or contaminate, Cannula Cleaning Soft Picks are the ideal single-use cleaning solution for smaller diameter cannulas and microinjectors. Autoclavable for use in the sterile field, if desired.

**CellFriendly Instrument Cleaning Brushes™**
These reusable brushes are the only brushes specially designed to clean CellFriendly Cannulas. The soft nylon bristles clean the lumen without damage to the CellFriendly surface. Use only Tulip brushes and Soft Picks on Tulip cannulas to maintain the CellFriendly benefits.

**Tulip Gold Standard Autoclave Trays™**
Tulip’s new Gold Standard autoclave trays are custom-designed to protect, house and store Tulip Gold Standard Sets and individual Tulip instruments.
